

Warsaw, 28.02.2014

Dear Prime Minister,

As a group of antinuclear activists from various organizations known as the Energy Coalition we would like to invite you to make visit in Poland. The funds for your journey and stay in Poland would be provided.

Poland is right now in important moment as for the future of energy sector and its economy. Last month the Polish government accepted the nuclear programme – a guide to build first nuclear power plant in our country despite the catastrophe in Chernobyl and Fukushima and other factors which put nuclear power at disadvantage like cost of power production.

We are strongly convinced that your visit in Poland would be very important for the „energy path” that will be chosen for Poland. As a person who experienced himself what nuclear power can bring and what are the „nuclear village” mechanisms you could pass your precious knowledge and experience to the Polish society. The energy transformation and use of renewables in Japan is also precious example for other countries. We believe that your visit would interest media and strenghten the awariness of energy issues in Poland especially if you visited places where nuclear power plant is to be built.

If you would like to come we propose the following programme of your visit:

21th of March Stay in Warsaw

1. Meeting with the Foreign Affaires Committee of the Polish parliament
2. Meeting with Japanese living in Poland
3. Open lecture at the university - Polish-Japanese Institute of Information Technology

22th of March Stay in Gdańsk (at the seaside where the first NPP in Poland is to be built)

1. Meeting with the activists and local communities from the sites chosen for building of NPP
2. Meeting with the local authorities from the places chosen for the NPP
3. March to the place where the first Polish NPP was to be built in the eighties and press conference in front of the ruins of the building

23th of March Depart from Gdańsk to Helsinki

The person in charge of your visit would be Andrzej Sławiński – phone number: +48510259888

Please let us know how you find our proposal.

Sincerely yours,

the Energy Coalition
